FOREXPO

Le salon européen de la sylviculture et de l'exploitation forestière

15/16/17 JUIN 2016 MIMIZAN

Press release / May 2016

Packed to the gunwales

The European rendezvous for silviculture and forestry exploitation in Mimizan, to be held from the 15th to the 17th of June 2016, is set to be packed with exhibitors.

Forexpo 2016 beats its own record. More than two months before the start date, and the event is already fully booked with exhibitors: the 3-km circuit is packed out and the five key areas (reforestation, fuelwood, forestry exploitation, transport, services) are all fully occupied.

This clearly indicates that the exhibitor's expectations were extremely high for this emblematic Southern European forestry event.

Exhibitions, in situ demonstrations, conferences, round tables and business meetings will focus on the major theme of innovation: "Innovate to stay one step ahead".

Forexpo 2016 will be the highlight of a world week devoted to cultivated forests. It will begin in Biarritz on the 13th and 14th of June, with the 2nd International Conference on Cultivated Forests,

organised by the IUFRO (International Union of Forest Research Organizations), marked by an international scientific seminar devoted to "the sustainable intensification of cultivated forests: where are the limits?".

The Forexpo site will also host the general meeting of the 'Fransylva Forestiers Privés de France' national federation as well as that of the DFCI Aquitaine. The general meeting of the 'Alliance Forêts Bois' will be held in Mimizan and the Convention of forestry experts in Dax.

At Forexpo's invitation, more than a dozen presidents from the European ETF organisations (forestry exploitation entrepreneurs) will also be visiting the event.

Forexpo 2012 had already crossed the threshold of 400 exhibitors and 30,000 professional visitors for the first time.
